SCALP NDS 72

Surface neutralizer and efflorescence treatment.

I Applications:

This product is designed for the neutralization of surfaces cleaned or scoured with alkaline products. Acidic permeating solution enabling the radical elimination of whitish salts on all surfaces.

II Product Advantages:

- Effective
- Does not mark
- Does not dull glass
- Ideal for the finishing of facades soiled by efflorescence or other salts

III Physicochemical Properties:

- Aqueous liquid
- Colourless
- Density: 1.02 g/cm³ at 20°C
- PH: 1
- Frost resistant
- Flash Point: Non-flammable

IV Instructions for use:

1. Dilution: Ready to use.
2. Tools: Roller, sprayer.
3. Method: Mix the product well and apply to the surface to be treated until total saturation. Renew the operation as often as necessary. Never rinse.
4. Application Time: This solution permeates the surface thoroughly.
5. Application Temperature: From 5 to 50°C. Efficacy is reduced at extreme temperatures.
6. Application Rate: According to surface porosity.

V Precautions for Safe Handling & Use:

1. Protection of surfaces: Avoid contact with steel, zinc, galvanized materials.
2. Protection of personnel: Avoid contact with eyes and skin. In case of contact, wash with water.

VI Cleaning of tools:

Clean tools in water immediately after use.

VII Packaging, palletising, storage:

- 20 kg: pallet of 24 X 20 KG
- 5 kg: carton of 4 X 5 KG

Important: The contents of this documentation result from our experience of the product. We cannot be held responsible for its use in each individual case. It is essential to test areas to be treated beforehand.
