SCALPINOX D

High performance aluminium cleaner, powerful degreaser, corrosion inhibitor and phosphatizer.

I Applications:

This product serves to renovate anodised aluminium tarnished by urban pollution. It is also an excellent degreaser and phosphatizing rust proofer for metals.

II Product Advantages:

- Does not affect anodised aluminium
- Affects neither glass nor rubber
- Fast
- Can be sprayed; can be used for soaking
- Not highly dangerous to use
- Odourless

III Physicochemical Properties:

- Aqueous product
- Colourless liquid
- Density: 1.16 g/cm³ at 20°C
- PH: 1
- Not frost resistant, but effects reversible
- Flash Point: Non-flammable

IV Instructions for use:

1. Dilution: Use the product neat for the cleaning of aluminium and dilute at the rate of 50% for use in a bath (phosphatizer).
2. Tools: Paintbrush, brush, roller, preferably nylon (synthetic), can be sprayed with a manual sprayer or airless spray gun, application by moistened cloth possible.
3. Method: Mix the product well before application. Apply the product to the surface then leave to act. Rinse efficiently with water under pressure (cold). Renew the operation as necessary.
4. Application Time: From 5 to 20 minutes according to the importance of the build up of grime.
5. Application Temperature: From 5 to 50°C. Efficacy is reduced at extreme temperatures.
6. Application Rate: From 150 to 200 g/m².

V Precautions for Safe Handling & Use:

1. Protection of surfaces: do not apply to limestone materials.
2. Protection of personnel: The product contains phosphoric acid. Wear gloves, eye protection. Avoid contact with eyes and skin. In case of contact, wash with water.

VI Cleaning of tools:

Clean tools in water immediately after use.

VII Packaging, palletising, storage:

- 25 kg: pallet of 24 X 25 kg.
- 6 kg: carton of 4 X 6 kg.

Important: The contents of this documentation result from our experience of the product. We cannot be held responsible for its use in each individual case. It is essential to test areas to be treated beforehand.
