SCALP ANTI-ARAIGNEE

An effective and radical solution for the treatment of spiders and insects. (**Curative and preventive**)

I Applications:

An effective treatment for spiders and insects on mineral, organic (old paint), hydraulic surfaces, organic or mineral paint (we would advise waiting 72 hours for paint to dry before applying SCALP ANTI-ARAIGNEE), wood etc.

II Product Advantages:

- Curative and preventive.
- Very easy to apply.
- Results visible within a week.
- Treatment on new or old surfaces
- Can be applied inside as well as outside.

III Physicochemical Properties:

- Colourless yellowish liquid.
- Density: 1 g/cm³ at 20°C
- PH: 8
- Frost resistant (effect reversible).
- Flash Point: None.

IV Instructions for use:

1. Dilution: Never dilute the product.
2. Tools: Roller or brush (all types) can be applied with an airless spray gun or sprayer.
3. Method: Clean the surface to be treated beforehand with the cleaner "**SCALPNET BIO 03**" this will ensure a good cutback. Mix the product well before application. Apply to the surface to be treated until saturation from the **base upwards**, on a dry surface. On very porous surfaces renew the operation a second time after half an hour.
4. Application Time: N/A. This is a permeating solution.
5. Application Temperature: From 5 to 50°C. Efficacy is reduced at extreme temperatures.
6. Application Rate: From 250 to 350 g/m² according to surface porosity.

V Precautions for Safe Handling & Use:

1. Protection of surfaces: Avoid contact with vegetation.
2. Protection of personnel: Wear gloves, eye protection and a protective mask.

VI Cleaning of tools:

Clean tools in water immediately after use.

VII Packaging, palletising, storage:

- 20 litres: pallet of 24 X 20 litres.
- 5 litres: carton of 4 X 5 litres.

Important: The contents of this documentation result from our experience of the product. We cannot be held responsible for its use in each individual case. It is essential to test areas to be treated beforehand.
