## **SCALPEX BAT 78 G9**

### **POWERFULL REMOVER FOR THICK FACADE POLYMER COATINGS AND VARNISHES**

#### **I - PROPERTIES**

As it contains methylene chloride, this remover is effective on a large variety of paints, varnishes, and thick plastic coatings.

SCALPEX BAT 78 G9 is formulated with the lowest possible quantity of paraffin, and is completely emulsifiable in water, which makes it easy to clean up with water.

SCALPEX BAT 78 G9 can also be used to remove inks and glues.

#### **II- CHARACTERISTICS**

- Visual aspect: yellowish gel
- Specific gravity: 1.210 g/cm<sup>3</sup> at 20°C
- pH: 10.5
- Efficiency: 300 to 600 g/m<sup>2</sup>

#### **III- INSTRUCTIONS FOR USE**

- Apply product with a brush or roller on the coating. Coating to remove must be dry, and ambient temperature between 5 and 50 °C.
- Let swell for 15 to 30 minutes until coating is softened.
- With putty knife or a scraper, remove all disaggregated paint and recover it in appropriate package, for later disposal.
- Rinse with water under pressure (100-150 bars) – always downwards. Rinsing must be done carefully to avoid further problems when recoating.

#### **IV- WARNING**

- This product can harm rubber, polystyrene, plastic tiles, aluminium and zinc. Such materials must be protected prior to applying remover.
- Avoid contact with skin and eyes; wear protective clothing, gloves and goggles. When accidentally in contact, immediately wash with soap and water.
- Avoid breathing the vapours.
- Store product under shelter, and avoid direct exposure to sun during storage.

**Important:** Information contained here above is the result of our experience with the product. We cannot be held responsible for any particular use of the product. It is recommended to make a trial prior to using product.
