SCALP NET EDJ 28

BLEACHING GEL - BACTERICIDE AND FUNGICIDAL

I-PROPERTIES

SCALP NET EDJ 28 is thick gel; it contains sodium hypochlorite which action is enhanced by surfactants. Being thixotropic, it can stand over vertical surfaces for hours, which in some cases may be necessary for a good result.

Its major utilisations are:

Efficient bactericide and fungicide: in contact with bacteria, mosses or mildew, SCALP NET EDJ 28 produced active chlorine that destroys them.

Efficient bleacher of persistent images of graffiti: wiping off graffiti completely is often impossible, in particular when they are drawn with markers. You need to bleach the persistent coloration with SCALP NET EDJ 28 which active chlorine bleaches remaining dyes.

II- CHARACTERISTICS

Visual aspect: Gel, slightly yellow

Specific gravity: 1.10 g/cm³ at 20°C

pH: 14

Efficiency: 200 to 300 g/m² depending upon substrate

III- INSTRUCTIONS FOR USE

Apply SCALP NET EDJ 28 with a roller, or a brush, or spray it over surface, which normally was previously treated with SCALP ANTI GRAFFITI 49. Use nylon or synthetic fibre tools.

Let it stand for one or more hours, for complete action, then wash with water under pressure.

Repeat process if necessary.

IV- WARNING

Avoid contact with skin and eyes, when accidental contact occurs, wash immediately with water and soap.

Do not breath vapours, do not blend with acids.

Store product away of sunshine and bad weather.

Important: Information contained here above is the result of our experience with the product. We cannot be held responsible for any particular use of the product. It is recommended to make a trial prior to using product.
